*Re: Polymer Flame Retardant*

Dear partners,

This letter is to inform you that from now on Sibur-Khimprom (Perm) will use brominated styrene resin-based polymer flame retardant instead of conventional hexabromocyclododecane (HBCD) as a reagent in its production of expandable polystyrene (Alphapor) of PSV type SE brand MIX, 91, 201, 301, 401, 501, 502, 601, 701.

Based on the PSV technology, the content of flame retardant in PSV is 0.6% minimum.

Yours sincerely,

K.A. Zernin  
Chief Process Engineer

A handwritten signature in blue ink, appearing to be "K.A. Zernin", written over a faint circular stamp or watermark.
